A highly responsible and self-motivated college junior with an IT (Information Technology) major at King Mongkut's Institute of Technology Ladkrabang. Seeking an opportunity for a cooperative position as a Fullstack developer that will allow me to apply and expand my skills in Fullstack development your company. I look forward to the opportunity to work with your team.

Education

King Mongkut's Institute of Technology Ladkrabang, Thailand

2022 - Present

Bachelor of Science in Information Technology

Major – Information Technology (Software Development), Anticipated August 2026

Projects

FinTax System (In-progress) – Thai stock Tax & Investment Analysis

Aug 2025 – Present

- Developing a full-stack platform to automate dividend tax management and AI-driven portfolio tracking for Thai stock market investors
 - Integrating AI models (LSTM/BERT) to analyze market trends and provide data-driven investment insights for enhanced decision-making
 - Tech Stack: Next.js, FastAPI, MongoDB, TensorFlow/Keras, and FastAPI
-

Connextra – (Real-time Chat Application on AWS Cloud)

Sep 2024 – Nov 2024

- Architected a scalable real-time chat application on AWS using a serverless-first approach and WebSockets via API Gateway for bi-directional messaging
 - Implemented a hybrid database strategy utilizing DynamoDB for low-latency chat history and RDS (PostgreSQL) for relational user metadata
 - Developed and deployed the full-stack solution using React, Node.js, and TypeScript on secure AWS infrastructure including EC2 and VPC
-

Calendoo Todolist - Todolist and Project Task List Website

Apr 2024 - May 2024

- Managed a system that recorded to-do lists and projects to be completed each day
 - Leveraged a modern UI framework combination of ReactJS, TailwindCSS and DaisyUI to streamline development, enabling a 50% reduction in development time compared to traditional approaches
 - Used Prisma as Database Services and Typescript as Backend Services. Used MongoDB for database
-

RestaurantEU - Restaurant Management System

Jan 2024 - Mar 2024

- Developed a customer interface for browsing and ordering menu items, with a system to display dish statuses. Implemented an employee login system with access to features such as a dashboard, order preparation, serving, and cashier pages.
- Used Laravel Framework as the PHP framework that employs the MVC (Model-View-Controller) pattern to make the code more readable and organized and used MySQL for the database system

Activities

Tech Staff (Frontend Dev) – IT Openhouse 2025

Jan 2025 – Mar 2025

School of Information Technology, KMITL

- Developed landing page with registered form for IT Openhouse Camping using NextJS, Typescript and NestJS for backend development

Tech Staff (Frontend Dev) - ITCamp20

Jan 2024 – Apr 2024

School of Information Technology, KMITL

- Developed a website for promoting and recruiting for ITCamp20 using the Nuxt framework and TailwindCSS for web development

Registration Staff - UNITE Camp 5

Jan 2023

School of Information Technology, KMITL

- Was responsible for managing the registration process for staff and campers participating in the event

Experiences

Wordpress Developer – Sri Ayutthaya

Nov 2025 – Jan 2026

- Designed and implemented a high-performance landing page using Wordpress and Elementor Pro, focusing on conversion-centric design and mobile responsiveness
- Integrated professional booking and menu management systems through the Five Star Restaurant plugin suite, enhancing the customer reservation experience
- Configured custom SMTP services to ensure 100% deliverability of contact form inquiries, integrated with Roundcube webmail for efficient business communication management

Fullstack Developer - Internship

Oct 2024 – Mar 2025

Firmer Co. Ltd

- Inventory System: Engineered a full-stack solution to manage specialized chemical stocks, featuring Inbound/Outbound workflows and automated Purchase Order management
- Developed a comprehensive Inventory Management System using React and TypeScript, leveraging MUI for robust UI components and Tailwind CSS for highly customized layouts
- Architected a scalable backend with Node.js, implementing complex data models and aggregation pipelines using Mongoose and MongoDB to ensure data integrity for chemical stock records

Skills

Languages : Thai (Native), English (Intermediate)

Programming Languages & Frameworks : HTML, CSS, Python, PHP, JavaScript, React, FastAPI, TypeScript, NextJS, Vue, Django, TailwindCSS, Nodejs, Laravel, Mongoose

Databases : MySQL, Sqlite, MongoDB, PostgreSQL, Prisma ORM

Tools : Git, Docker, Visual Studio Code

Personal Skills : Fast learner, Teamwork, Problem-solving, Leadership
