A highly responsible and self-motivated college junior with an IT (Information Technology) major at King Mongkut's Institute of Technology Ladkrabang. Seeking an opportunity for a cooperative position as a Backend developer that will allow me to apply and expand my skills in Backend development your company. I look forward to the opportunity to work with your team.

Education

King Mongkut's Institute of Technology Ladkrabang, Thailand **2022 - Present**
Bachelor of Science in Information Technology
Major – Information Technology (Software Engineering) , Anticipated August 2026

Projects

TicketFlicks - (Movie Ticket Booking and Review System) **Jun 2024 - Jul 2024**
- Included a payment system for booking tickets and a feature for users to favorite and review movies
- Designed and developed a user-friendly website utilizing NextJS for the frontend and Django for the backend. Used PostgreSQL as a Relational Database Management System

Calendoo Todolist - (Todolist and Project Task List Website) **Apr 2024 - May 2024**
- Managed a system that recorded to-do lists and projects to be completed each day
- Leveraged a modern UI framework combination of ReactJS, TailwindCSS and DaisyUI to streamline development, enabling a 50% reduction in development time compared to traditional approaches
- Used Prisma as Database Services and Typescript as Back-end Services. Used MongoDB for database

RestaurantEU - (Restaurant Management System) **Jan 2024 - Mar 2024**
- Developed a customer interface for browsing and ordering menu items, with a system to display dish statuses. Implemented an employee login system with access to features such as a dashboard, order preparation, serving, and cashier pages
- Used Laravel Framework as the PHP framework that employs the MVC (Model-View-Controller) pattern to make the code more readable and organized and used MySQL for the database system

PSIT Place - (IT Products E-commerce) **Sep 2022 - Dec 2022**
- An e-commerce system for buying and selling IT equipment where managers can manage products
- Developed a backend system using Flask Python and MySQL for database storage.
- Applied Python, JavaScript, HTML, and CSS for frontend development
